AMENDMENT

Dear Sir:

In response to the Office communication mailed March 1, 2001, please amend the above application as follows:

IN THE CLAIMS

Please amend claim 1 as follows:

1. A reversible ratchet-type wrench comprising:

a handle;

a head extended from the handle and including a hole, a web being defined between the handle and the head, a cavity being defined in the web and communicated with the hole, the web further including a compartment having a first end communicated with the cavity and a second end communicated with outside, thereby leaving a bridge in the web;

a drive member rotatably mounted in the hole of the head, the drive member including a plurality of teeth formed on an outer periphery thereof;
